

NEU CASE STUDY QUESTIONS

1. Project:
2. Location:
3. Type of project (high-rise, low-rise, big box, bridge, pavement, etc.):
4. How does this project/study contribute to lower carbon emissions in concrete production?
5. Can you quantify the carbon footprint?
6. Do you have concrete mixture proportions information?
7. Does this project involve any proprietary products? If “Yes” please list them all.
8. Can you provide design information (at least design strength for different members if applicable)?
9. What impact did this mix have on the carbon emissions/sustainability of the project?
10. Are there any other design/long term performance considerations that you would like to highlight?
11. Were other sustainable options considered? If so, what types of mixtures?

12. Have you used this mix on other projects, and if so what other projects?

13. Do we have permission to share this information through the NEU website?
